

WATER FILTRATION PH

CLIENT PRODUCT PRESENTATION

Dear Valued Client,

Good day! We are pleased to introduce **Water Filtration PH**, a practical water filtration solution designed to provide convenient access to filtered drinking water at home, in offices, and in selected business establishments.

OUR WATER FILTRATION SYSTEM

Our wall-mounted alkaline water filtration system is designed with a **6-stage filtration process** to help improve water quality, taste, and overall drinking-water convenience.

6-STAGE FILTRATION

1. **Sediment Filter** – Helps reduce suspended particles such as dirt, sand, and rust.
2. **Pre-Filtration** – Provides additional particulate protection.
3. **Carbon Filtration** – Helps reduce chlorine and unwanted taste and odor.
4. **Fine Filtration** – Provides additional filtration of selected fine particles.
5. **Mineral / Media Stage** – Supports the intended water-conditioning process.
6. **Alkaline Stage** – Raises the pH according to the system design.

KEY BENEFITS

- Convenient access to filtered drinking water
- Direct connection to a suitable tap-water source
- Wall-mounted and space-saving design
- Reduces dependence on regular bottled-water deliveries
- Suitable for homes, offices, and selected establishments
- Professional installation and customer support

PACKAGE DETAILS

Product Price: ■10,999

Included Service:
